Website: https://miscj.aut.ac.ir, Email: ce.miscj@aut.ac.ir

# AUT Journal of Modeling and Simulation (MISCJ)

**Bibliographic & Identifiers:**

Print ISSN: 2588-2953

Online ISSN: 2588-2961

DOI Prefix: 10.22060/miscj

Publication Frequency: Semiannual

Start Year: 2009

Coverage: Volume 58, Issue 2, 2026, Pages 173-300

**Publishing Body & Governance:**

Publisher: Amirkabir University of Technology (Tehran Polytechnic)

Online ISSN: 2588-2961

Director-in-Charge: Dr. Masoud Sabaei (Associate Professor, Computer Engineering Dept., AUT)

Editor-in-Chief: Dr. Mohammad Bagher Menhaj (Professor, Electrical Engineering Dept., AUT)

**Open Access & Ethics Policies:**

Publisher: Amirkabir University of Technology (Tehran Polytechnic)

Access Model: Open Access

License: Creative Commons Attribution-NonCommercial 4.0 (CC BY-NC 4.0)

Copyright: © 2026 Amirkabir University of Technology & Authors

Plagiarism Detection: Screened with iThenticate Similarity Check

Indexing and Abstracting: Scopus, DOAJ, EBSCO, ISC, SID, Google Scholar, MSRT

Review Model: Double-Blind Peer Review

**Contact Information:**

Editorial Office: Center for Information Services, Library and Publishing, Amirkabir University of Technology, 424 Hafez Ave, Tehran, Iran. P.O. Box: 15875-4413

## Editor-in-Chief

Mohammad Bagher Menhaj, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

## Associate Editors

Behrooz Karimi, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Seyed Hossein Hosseinian, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Mohammad Javad Yazdanpanah, Ph.D.
Professor, University of Tehran, Tehran, Iran

Gevork B. Gharehpetian, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Mohammad Mehdi Ebadzadeh, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

## Editorial Board

Khashayar Khorasani, Ph.D.
Professor, Electrical Engineering Department, Concordia University, Montreal, Canada

Alireza Bakhshai, Ph.D.
Professor of Electrical Engineering, Queen's University, Ontario, Canada

Hamed Nafisi, Ph.D.
Associate Professor, Amirkabir University of Technology, Tehran, Iran

Thierry Pozzo, Ph.D.
Istituto Italiano di Tecnologia, Genoa, Italy

Abbas Mohammadi, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Hamid Khaloozadeh, Ph.D.
Professor, K. N. Toosi University of Technology, Tehran, Iran

Heshaam Faili, Ph.D.
Professor, Department of Computer Engineering, University of Tehran, Tehran, Iran

Mostafa Shamsi
Associate Professor, Amirkabir University of Technology, Tehran, Iran

Mehrzad Shams, Ph.D.
Professor, K. N. Toosi University of Technology, Tehran, Iran

Paeiz Azmi, Ph.D.
Professor, Tarbiat Modares University, Tehran, Iran

Fariba Bahrami, Ph.D.
Associate Professor, University of Tehran, Tehran, Iran

Seyed Jamshid Mousavi, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Touraj Taghikhany, Ph.D.
Associate Professor, Amirkabir University of Technology, Tehran, Iran

Hamed Heydari-Doostabad, Ph.D.
Assistant Professor, University College Dublin, Dublin, Ireland

Seyyed Majid Esmailifar, Ph.D.
Assistant Professor, Amirkabir University of Technology, Tehran, Iran

Saleh Mobayen, Ph.D.
Associate Professor, National Yunlin University of Science and Technology, Taiwan

Ali Tavakoli Kashani, Ph.D.
Associate Professor, Iran University of Science and Technology, Tehran, Iran

Hamid Reza Taghirad, Ph.D.
Professor, K. N. Toosi University of Technology, Tehran, Iran

Babak Nadjar Araabi, Ph.D.
Professor, University of Tehran, Tehran, Iran

Hamed Shakouri Ganjavi, Ph.D.
Associate Professor, University of Tehran, Tehran, Iran

Ali Khaki Sedigh, Ph.D.
Professor, K. N. Toosi University of Technology, Tehran, Iran

Mahmoud Amiri, Ph.D.
Professor, Kermanshah University of Medical Sciences, Iran

Martin Hagan, Ph.D.
Professor, Oklahoma State University, Stillwater, USA

Seyyed Ali SeyyedSalehi, Ph.D.
Associate Professor, Amirkabir University of Technology, Tehran, Iran

Horst Schulte, Ph.D.
Professor, School of Engineering, University of Applied Sciences Berlin, Germany

Kambiz Jamshidi, Ph.D.
Professor, , TU Dresden, Germany

Morteza Azad, Ph.D.
Assistant Professor, School of Computer Science, University of Birmingham, United Kingdom

Shabnam Sodagari, Ph.D.
Associate Professor, California State University Long Beach, USA

Mohsen Yarmohammadi, Ph.D.
The University of Texas at Dallas, Richardson, USA

S. Salman Nourazar, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Farzad Towhidkhah, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Bui Dinh Hoi, Ph.D.
Professor, University of Education, Hue University, Vietnam

Ali Kamali, Ph.D.
Associate Professor, Amirkabir University of Technology, Tehran, Iran

Le Thi Thu Phuong, Ph.D.
Professor, University of Education, Hue University, Vietnam

Abdolali Abdipour, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Keyvan Forooraghi, Ph.D.
Professor, Tarbiat Modares University, Tehran, Iran

## Advisory Board

Seyed Hossein Hosseinian, Ph.D.
Professor, Amirkabir University of Technology, Tehran, Iran

Alireza Bakhshai, Ph.D.
Professor, Queen's University, Ontario, Canada

Thierry Pozzo, Ph.D.
Istituto Italiano di Tecnologia, Genoa, Italy

## Editorial Board Assistants

Majid Badieirostami, Ph.D.
Assistant Professor, University of Tehran, Tehran, Iran

Mohsen Hafez-Torbati, Ph.D.
Institut für Theoretische Physik, Goethe University Frankfurt, Germany

## Executive Manager

Zahra Habibnejad
Senior Expert, Amirkabir University of Technology, Tehran, Iran

# About the Journal

AUT Journal of Modeling and Simulation is a double-blind peer-reviewed semiannual journal published by Amirkabir University of Technology. The journal follows an open access policy, with articles archived online on our website & also other reputable repositories, accessible for free. We invite original research articles, review papers, case studies, and communications from scholars globally. Our aim is to provide a platform for researchers to share their findings and contribute to the advancement of the field of modeling and simulation. We seek to foster collaboration and exchange of ideas among academics, practitioners, and industry professionals. Join us in our mission to push the boundaries of knowledge and drive innovation in modeling and simulation.

**Open Access Policy**

AUT Journal of Modeling and Simulation is a libre green open access journal, published & supported totally by Amirkabir University of Technology as an Academic University Publisher. This policy facilitates the widest possible dissemination of your work with no fees. The open access material on our website is subject to the terms and conditions of the Creative Commons Attribution-NonCommercial 4.0 Generic (CC BY-NC 2.0) license. Authors can self-archive their articles or post a free copy of their article on a repository or website after it's been made available on our website provided that appropriate credit is given to the formal publication on our website using the uniquely assigned DOI of the article.

**Copyright Agreement**

Once a manuscript has been accepted for publication by the journal, authors will be requested to fill and sign the copyright agreement to grant publisher rights to the journal. These rights include the exclusive right to publish and distribute the accepted article in all forms and media and the authority to enforce the rights in the article, on behalf of an author, against third parties, in cases of plagiarism or copyright infringement.

**Author Rights**

Authors transfer copyright to the journal after signing the copyright agreement, but they retain the rights to:

- Share their article for personal use, institutional use and self-archive their article for non-commercial scholarly purposes with the assigned DOI link to the article on our website with a compatible creative commons license
- Claim patent, trademark and other intellectual property rights (including raw research data)
- Proper attribution and credit for their published work

**Article Processing Charges**

AUT Journal of Modeling and Simulation doesn't have any submission or article processing charges (APCs).

## B) Aims & Scope

The AUT Journal of Modeling and Simulation (AJMS) is a semiannually journal which provides an international forum for researchers, scholars, and engineers in the fields of system modeling, identification, simulation and control to publish high-quality and refereed papers, including the latest theoretical results and their practical applications.

The covered technical areas include, but not limited to:

- Mathematical Modeling
- Model-free (experimental) Modeling
- Applications of modeling and simulation in the following disciplines:
  - Robotic and mechatronic systems
  - Biological and medical systems
  - Electromagnetic systems
  - Agricultural and environmental systems
  - Industrial, military, aerospace systems
  - Power systems
  - Economic and Financial Systems
  - Social systems
  - Civil and Environmental Systems
  - Mechanical and Aerospace Systems
  - Computer and Information Technology Engineering
- System identification
- Linear and nonlinear control
- Optimization and optimal control
- Robust control
- Adaptive control
- Networked and Cooperative control
- Distributed Control
- Quantum control
- Soft computing and control
- Iterative learning control
- Data processing
- Process control and instrumentation
- Control in power electronics
- Fault detection and isolation
- Model predictive control
- Stochastic control and filtering
- Vibration and Noise Control
- Neural networks and fuzzy logic
- Intelligent systems
- Hybrid systems
- Discrete event systems
- Multi-agent Systems
- Communication Systems

# Authors Guide

**Article Submission:**

All researchers are requested to send their manuscripts through online submission system at the journal website in accordance with the manuscript guidelines. The AUT Journal of Modeling and Simulation accepts articles written in English. The submitted articles are not considered if they have been formerly published or under consideration for publication anywhere else. Furthermore, the authors of the article are held responsible for the validity of the contents of the article.

**Peer Review of an Article:**

Highly acclaimed reviewers assess all the articles. Prompt response of the authors to the corrections and revision requested by the reviewers will result in shorter evaluation time. It is necessary to highlight all the corrections applied to the article in yellow so that the reviewers are able to assess the revised article within the shortest time possible. Please note that the type of review is "Double-Blind Peer-Review" and reviewers' comments are considered highly confidential and the authors will view reviewers' comments, questions and requests under the anonymous titles of “reviewer1” and “reviewer2”. Also, the authors identities are hidden from the reviewers.

**The General Format of the Article:**

The size of the pages should be A4. The text should be written in a single column.

## The Main Text:

The article should be written in the format of Microsoft Word and include a minimum of seven pages and a maximum of twenty pages. Each article is divided into various sections as mentioned below:

**The Title:**

The title should include a maximum of fifteen words and determine all the features of the research. Use of abbreviations in the title should be avoided.

**The Authors’ Names:**

The authors’ names should be written in one line following the title of the article. In additions, the authors have to mark the corresponding author’s name using an asterisk (*) on top of his/her name in the list of authors. The corresponding author must be a faculty member.

**The Authors’ Personal Information:**

The authors’ information should include their scientific degree, the name of the faculty and university, city, country. This information should be written in one line for each author and referred to the author mentioning the number.

**Abstract:**

The abstract should clearly state the topic and the results of the research carried out in a 200 to 250 -word paragraph. In other words, the significance of the subject, the necessity of carrying out this research and a summary of the method and significant results of the research should be stated in the abstract. Including details, tables, illustrations, mathematical equations and if possible, referencing should be avoided.

**Keywords:**

The number of keywords presented at the bottom of the abstract page have to be 5 words.

**The Introduction:**

In this section, primarily the general aspects of the subject should be stated and afterwards a summary of the history of the subject and the studies carried out accompanied by their features (in a way which clarifies the importance of it for the reader.) In the following parts, the innovation and contribution of the research carried out within the borders of science and technology with the purpose of eliminating problems and shortages, finding solutions or progress towards innovative findings, will have to be explained in one or two paragraphs.

**Theoretical or Experimental Modeling:**

The main points stated in this section should include the definition of the problem proposed, the necessary notions, the methods of theoretical or experimental modeling and the proposed solutions. If any figures, tables and mathematical equations are used in the article, they should be referred to in the main text of the article.

**The Results and Discussion:**

The most important part of a scientific research article is the clear provision of the results achieved. Therefore, it should be vividly illustrated that the developed model has provided accurate results both quantity and quality-wise. It is also necessary to thoroughly discuss the behavior of all the results in different illustrations and tables so that the reader can be reassured of the validity of the research conducted.

**Conclusion:**

In this section, the important points should be summarized and revised to easily inform the reader about the main results. In this part, the applications of the research conducted can be pointed out and new vague points that demand further research can be proposed or the development of the subject in other areas can be suggested.

**Acknowledgements:**

In this section, the authors may express their appreciation to the supporters of the research who have indirectly contributed to its development.

**List of Symbols:**

This list is located before the list of references and should include English symbols followed by Greek symbols in alphabetical order.

**References:**

The references may include books, articles from scientific journals, patented inventions, conference articles, theses, technical reports, educational workshops, valid websites and other reliable sources. Referring to unpublished reports, rejected articles and other invalid sources should be avoided. The list of references should be included at the end of the article in English in order of appearance in the text. Therefore, if Persian sources have been used, their information should be translated into English and the term (in Persian) should be written at the end. All the references should be referred to in the main text of the article only by using their number in the reference list in brackets (e.g. [1]) and it is not needed to mention the word "reference" before it (e.g. reference [1]) unless a sentence starts with these words ( e.g. in reference [1] ….). In order to refer to two references or several references with nonconsecutive numbers, authors should use commas. Fore referring to several references with consecutive numbers, they should use a dash (e.g. [1, 2], [12-15], [2, 9, 6] or [1, 3-4]).
It is necessary to use EndNote style of AUT Journal of Modeling and Simulation, which is uploaded in the journal website. To install the style in the EndNote, do as follows:

(a) Download the style from journal website .
(b) Double-click the style file. It should open in EndNote
(c) In EndNote, go to "File Menu" and choose "Save As". Replace the word "copy" with your style's name and click "Save".
(d) ) Click on "File Menu" and choose "Close Style".

**The Figures:**

The schemata, charts, and images used should all be titled "illustration" and be centered in the text. The figures used in the article should be of acceptable quality. After the peer review process and acceptance of the article, the illustrations should be sent separately with a quality of at least 300 pixels/inch and in the TIFF or JPEG format. The label of each axis in the charts should be mentioned with the measurement unit written in parentheses after it separated by a comma.

**The Tables:**

The contents of the tables should be written in English in the center and if captions are used in the tables, they should be located under the corresponding table. The tables should not be presented in the image format.

**Mathematical Equations:**

MathType is a highly practical tool for writing math equations and all the equations in the article should be written using this editor. The explanation of all the variables, components and new symbols used in the equations (if not explained earlier in the text) should be written immediately after the equation without any gaps. All variables must be typed Italic while their units must be typed as normal.

**Measuring Units:**

The accepted measuring unit is the SI system and if necessary, the equivalent in another measuring system may be mentioned in parentheses.

**Plagiarism Check:**

This journal uses iThenticate Plagiarism Detection Software to avoid plagiarism in published papers.
